

## Wastewater Treatment Operator - Nathrop, CO

We are a homeowners association (HOA) community with 306 privately owned lots in Nathrop, CO. Our wastewater treatment facility is a sequencing batch reactor (SBR) plant, designed to process up to 12,100 gallons per day. The system includes a single lift station. As the sole wastewater operator for our community, you would be responsible for all aspects of the system's operation and maintenance. Salary level will be commensurate with experience.

The job will entail approximately 20–25 hours per week of work related to the wastewater system. The operator must follow all regulatory requirements for both the discharge permit and the Public Water System (PWS). This includes adhering to sampling schedules, completing regulatory paperwork, and performing daily monitoring and maintenance of the facilities. Specific tasks and time commitments may vary depending on the sampling schedule and compliance needs.

### Job Requirements:

- High School diploma or general education degree (GED)
- Possess a valid Colorado driver's license
- Minimum of one year of industry experience (preferred)
- Must possess a minimum of a Colorado Wastewater Treatment Operator (B) and Wastewater Collection System Operator (1)

### Job Responsibilities:

- Engages in the daily operation and maintenance of secondary wastewater treatment facilities and collection system including but not limited to treatment, changing chemical containers, dewater sludge, delivers needed materials, and performs general plant maintenance and housekeeping including buildings and grounds.
- Participates in operating, repair and maintenance of pumps, motors, sludge equipment and other related equipment.
- Cleans precipitates such as grit, solids, trash, and debris from sump, catch basin and grit chamber. Opens and closes gates and valves according to process demands or needs.
- Collects samples and conducts wastewater laboratory tests.
- Responds to alarms and equipment failures. Takes necessary actions to maintain acceptable plant operations.
- Maintains a variety of records, reports and logs for treatment facilities.
- Performs calibration, preventative maintenance and emergency repairs on all instrumentation, equipment, and facilities used in treatment processes.
- Makes regular assessments of water and wastewater flow, turbidity, BOD, pressures, chemical usage, residuals, temperatures and other pertinent data to maintain proper plant operating conditions.
- Observes pumping equipment at lift stations to identify possible problems and make appropriate repairs.

Work is mainly performed outside. Work often can call for lifting, pulling, or pushing of items weighing 50 pounds or more. The operator may be subjected to working near mechanical parts and in all outdoor weather conditions.

Successful candidates will complete pre-employment screening, which includes, but is not limited to a criminal background check, drug screen, and physical.
